

Sharing enthusiasm! Tom Bultreys, Physicist

“One of the things I liked is that the programme is locally focused. It was nice to get connected to locals and meet young people that are actually from here.”

Tom Bultreys, post-doc at Imperial College in the department of Earth Science & Engineering, believes that in2scienceUK is very important to give students the chance to have a positive experience in STEM.

“I enjoyed sharing my enthusiasm. From a CV perspective, you are gaining mentoring skills and learning how to do public outreach. It shows you support values like equal opportunity and diversity in science. It also gives you the chance to network with other scientists hosting students.”

“Being able to interact with different audiences and support diversity is very important.”
